

Floor sweeper for EX-zone 1 / 2 and 21/22

**KR 500 EX SWEEPER**

ATEX 95 (100 a) CE EX II 2G c IIB T4  
CE EX II 2D c T125°C

**Application**

Mechanical sweeper for use in Ex zones 1, 2, 21, 22 for receiving combustible and non-combustible residues production (MIE> 10mJ)

**Features / Advantages**

- Compact and very portable
- No motors or turbines
- Highest technical security
- Little effort required
- Low maintenance
- Very strong and light weight
- All relevant parts from high quality stainless steel
- Low-dust sweeping
- Height-adjustable handle
- Wastebasket protects against drifts
- Side brush height adjustment

This versatile sweeper working in the dustpan principle and is primarily for recording production of dry residues in the exterior and interior design. Using the 500mm wide brush roll can clean production areas and warehouses for up to six times faster than with a standard broom. The rotating brush roller, can eliminate impurities with minimum effort quickly and effectively.

The sweeper KR 500 EX complies with directive 94/9/EC standards. The sweeper is hand made and has no electrical power supply. The brush roller is driven mechanically by the wheels on straight and shows a very good cornering and handling. Even in curves around the brush roll evenly. A side brush with natural bristles provide an additional work faster. The collection container is removable, easy to empty and clean.
