Industrial vacuum for dust

Electric

EP 1122 ECO

Mobile heavy-duty industrial vacuum cleaners for dusts

Range of application

High performance industrial vacuum cleaner designed for sucking up dust. The rugged construction suitable for rugged industrial use. Can also be used in small tube or systems with long suction hoses.

Properties/Advantages

- Highest technical security
- Very robust
- Soundproofed turbo fan
- Effective, easy-to-use filter
- Vacuum gauge for filter monitoring
- Simple operation and maintenance

Cyclone separator for better pre-filtering of fine dust particles and coarse material. Guarantee for a safe attachment of the suction hose with a quick release locking mechanism and swivel system. The extremely simple operation and cleaning facilities of the nipple are specially designed to meet industrial requirements.

Tension rings

Robust tension hook

H filter easily accessible

Vacuum relief valve
